Abstract

Manubot Rootstock Information

Note: Manubot instances should delete this file.

The Manubot is a system for automating scholarly publishing. Content is written in Pandoc Markdown source files. See `USAGE.md` for more information on how to use the Manubot.

The Manubot project began with the Deep Review, where it was used to compose a highly-collaborative review article [1]. Other manuscripts that were created with Manubot include:

- The Sci-Hub Coverage Study (GitHub, HTML manuscript) [2]
- Michael Zietz's Report for the Vagelos Scholars Program (GitHub, HTML manuscript) [3]

If you notice a problem with Manubot, it's best to submit an upstream fix to the appropriate repository: `greenelab/manubot-rootstock` for the git repository stub or `greenelab/manubot` for the Python package.
